

Unimarconi
LA PRIMA UNIVERSITÀ
DIGITALE ITALIANA

The background of the entire page is a photograph of three people in a professional setting. A man with a beard and a red tie is smiling and looking at a woman with blonde hair. Another woman with glasses is visible on the left. The image is slightly blurred, giving it a professional and collaborative feel.

Master in Educational Leadership, Management and Emerging Technologies

Master in Educational Leadership, Management and Emerging Technologies

Who is this master for:

The admission requirements include the possession of a four-year Bachelor degree issued by Italian universities. Foreign students can enrol in the Master's if they have a degree equivalent to the Italian first-level degree (bachelor) or higher, and legally recognized by the ANVUR system.

Profile and Professional Opportunities

Upon completion of the program, graduates will be well-equipped to pursue diverse career paths, including roles as Education and Higher Education managers, Directors of e-learning units or projects within public school administrations, Corporate training leaders, Recreation management Directors, and Educational policy administrators. Thanks to a solid foundation in educational leadership, management, and emerging technologies, graduates will possess the skills and knowledge necessary to excel in these positions, contributing to the advancement and innovation of educational practices and policies.

Overview

The Master's in Educational Leadership, Management, and Emerging Technologies addresses the pressing need for innovation in teaching and learning methodologies. It offers comprehensive training for educators and administrators tasked with spearheading organizational change within the education system. This program is tailored for individuals aspiring to leadership roles in education, providing exposure to cutting-edge research and practices in educational institution management. Led by seasoned practitioners and dedicated researchers, the curriculum seamlessly blends theory with practical application. Graduates emerge equipped with enhanced oral communication, problem-solving, critical thinking, and team-building skills, positioning them to make meaningful contributions to educational advancement.

Learning Objectives

By the program's conclusion, students will achieve the following learning objectives:

- Utilize prevalent interactive emerging technologies and multimedia to enhance educational activities.
- Display a critical understanding of the multifaceted influences on leadership and management within organizations.
- Foster a deep and thorough understanding of contemporary issues in leadership and management.
- Demonstrate an increased awareness of the factors and values shaping policy development and implementation in education and training
- Contribute towards elevating the standard of managerial performance within educational and other human service contexts.

Modules

- Distance Learning and E-learning
- Lifelong learning
- Learning techniques and learning technologies
- Leadership
